

T360^f

3600 psi (245 bar) High Quality - Refined Design

The T360 is a high quality airless spray gun with many beneficial features that will prove itself to you with every trigger pull. From the lightweight and balanced handle to the comfortable trigger pull and superior valve-stem design - this spray gun is professional quality through and through.

Positive Shut-Off

Shut-off valve spring is located outside the fluid passages for reduced friction and longer service life.

Large Fluid Passages

Large-size fluid passages and a stream-lined valve stem offer less restriction and improved flow.

Superior design with fewer parts means reliable performance and easier maintenance!

Easy Filter Access

The filter is easily accessed from the handle for cleaning or replacement. Uses standard filters available in three different mesh grades for all applications.
