

Introducing  
the  
Multi-Media Series

One machine with

# DOUBLE THE CAPABILITY

Blasts both hard abrasives  
such as garnet and soft  
abrasives such as soda!

This unit is the very highest in technology of Abrasive Blasting Units. With the ability to blast both hard medias such as Garnet and any soft media such as Soda, it provides a versatility which is hard to beat. It also comes complete with the latest in technology for abrasive metering a Thompson Valve two with the clean out sleeve and air flow control including a Grit Suppression Valve that eliminates abrasive back flow incidents.

- Lower profile for easier filling
- Greater weight distribution of controls and piping
- 150 psi 18" Diameter Vessel with 90 degree Cone Bottom
- Intergrated loading skid and handle
- Stainless steel control panel with differential pressure gauge
- Full by pass piping for use of other blast media applications
- Cyclonic Moisture Separator and Air Regulator Standard
- Water attachment option for dust suppression
- Pnuematic Vibrator for increased flow of media
- Lid and screen for media protection when not in use

Technology  
that has never  
been seen  
before
